 Tax Application II

Easy • Score 80/80 • Spring Hibernate

Problem statement [Send feedback](#)

Continuing the **tax application**, you must prompt the user to select which type of tax he wants to pay and load up the corresponding bean from the application Context. Complete the logic in the given code template.

Tasks:-

1. Go to the application's main class.
2. Complete the switch case.
3. Pick the bean from the application context using the taxChoice string.
