

Car Service Registration 1

The screenshot shows the Coding Ninjas Classroom interface for a problem titled "Car Service Registration". The problem is categorized as "Easy" with a score of 80/80 and is associated with "Spring Hibernate". The problem statement asks the user to create a car service registration application for KIA India using the MVC concept, requiring a "Welcome" page and a "Signup" page. The tasks are listed as follows:

- You need to create two controllers:
 - WelcomePageController
 - RegisterController
- The path for both controllers is mentioned below:
 - "/welcome" for the welcome page controller.
 - "/register" for the Register page controller.
- You need to create two .jsp files for view:
 - welcome.jsp: The href url for redirecting to the signup page should be "register".
 - carregister.jsp
- You must create a Car class domain model with the below attributes:
 - String registration number
 - String name
 - String details
 - Integer carId
 - String work

Special Instructions for submitting the solution:

On the right side, there is a sidebar with a list of steps: 1. Download starter kit, 2. Complete project on local IDE, 3. Export code as .zip file, 4. Upload .zip file max 50mb. At the bottom of the sidebar, there is a "Submit" button and an "Ask a doubt" button.

Output

1. Remove the **target** folder from the root directory of your project.
2. Remove the **"test"** folder from your **"src"** folder.

► Note:-

▼ Sample output:-

Welcome to the KIA Service Station
